

The AI-native operating system for workforce operations.

[Company] partners with healthcare organizations and staffing firms to deploy AI-native systems for recruiting, credentialing, engagement, scheduling, and workforce intelligence. A **comprehensive yet fully customizable AI agent system** connects to the systems where provider data already lives and executes the work required to make each clinician ready to start. **Every agent action is auditable and your people keep final approval.** Customers are seeing **roughly 70% faster time-to-start for clinicians** and far fewer delays from incomplete or slow verification.

HOW THE WORK GETS DONE

PROVIDER PLACED

READY TO WORK

DEFINE

Determines assignment and client-specific requirements; reuses documents already submitted.

VERIFY

Collects and verifies provider documentation; runs primary-source and exclusion checks.

EXECUTE

Completes forms across third-party systems, coordinates screenings, chases missing items.

DELIVER

Delivers submission-ready packets and maintains readiness through renewals and compliance.

ONE AGENT SYSTEM, BUILT AROUND YOUR WORKFLOW

Agents do the work

A comprehensive, customizable system of AI agents runs onboarding, credentialing, and compliance inside the tools you already use.

Humans keep final approval

Agents surface only exceptions and final decisions. Your team supervises outcomes and signs off, and every action is fully auditable.

Continuous clinician screening

Automated monthly exclusion and sanction checks on each clinician, keeping your roster audit-ready year round.

WHAT PARTNERS ARE SAYING

"In just 90 days the [Company] team understood our onboarding struggle and worked diligently to solve it. [Company] Brain has ingested **500+ onboarding requirements** and now automatically approves **over 20%** of them, enhancing both speed and quality while lessening the manual burden on our team."

Chief Technology Officer
National healthcare staffing firm

CLIENT TWO

UITMENT

"The biggest strength of working with [Company] is the people. They took the time to truly understand our business and industry. It feels like a true partnership. The team is consistently proactive and quick to adapt as our needs evolve."

Physician Recruiter

MEET THE TEAM

the Founder

Backed by a founding team with experience at enterprise technology and financial services, and degrees from leading universities.
